Head of department:

ACADEMIC YEAR (2024-25)

GOVERNMENT ENGINEERING COLLEGE BHARUCH

DEPARTMENT OF COMPUTER ENGINEERING

CERTIFICATE

This is to certify that the Report entitled “**Vehicle Leasing Website**” has been carried out by Patel Krisha (220140107041), Raj Patel (220140107060), following students under my guidance in fulfilment of the term work of **Bachelor of Engineering in COMPUTER Semester** of Gujarat Technological University, Ahmedabad during the academic year 2024-25.

Guided by:
Prof. Jatin D Chaudhari

Head of Department

Date: / /

PREFACE

The main aim of writing this report is to present all that work that we had done in Vth semester keeping design thinking in mind, on the domain “Vehicle Leasing Website”. In this report, we are presenting the canvases, prototype & other necessary information.

ACKNOWLEDGEMENT

We would like to extend our sincere thanks to our internal guide Prof. Jatin D Chaudhari for his useful guidance for our project. He guided us very much for project and report.

This movement asks for a token of gratitude to his for giving us this opportunity to undertake a project firm. Our heart full thanks to you sir .

Special thanks to our HOD and our project in charge, Prof. Jatin D. Chaudhari for opening up a new way of observing things which boosted our imagination and thought process in the project.

Patel Krisha	(220140107041)
Raj Patel	(220140107060)

ABSTRACT

Drive Ventures is a Vehicle Leasing Website. It is a website that uses the means of computer fundamentals and internet through which lender and borrower can interact and fix a lease deal of vehicles for a particular duration of time. Also it does provide you the way to interact with the fellow passengers with whom you can choose to pool. It is a platform where you can generate an extra income with secondary vehicle. It gives you a sense of self-independence and you can travel as per your accordance .It is very famous in the developed countries like USA, Canada , Japan, Germany. With India being a developing country, this business model can grow tremendously. It also helps in enhancing tourism and can attract a lot of foreign travellers. This website is built on basic web languages like HTML , CSS , Javascript along with a mix of advanced concepts of React JS, Vue for frontend. It has Node JS and ExpressJS as its backend and MYSQL and MongoDB as its databases.

CHAPTER : 1 INTRODUCTION

The Heavy Fare Prices of Taxi and Auto and the time consuming process for the wait of Taxi and Auto is a problem in itself. So to sort this rising issue "Vehicle Lease Website" is a perfect solution. As almost 70% of people in India know how to drive. Here we provide many options according to your choice and convince to travel anywhere according to your choice and the type of vehicle is of your preference. It also furnishes you with options of car and bike pooling ,E- Bikes and E-cars which support the idea of preserving the Environment.

Drive Ventures is the first vehicle leasing website which is a startup founded by college students of computer engineering. It is a platform which basically has two major stakeholders – Leaser and Borrower.

1.1 What is Vehicle Leasing?

Vehicle Leasing is renting a vehicle for a definite period of time with an agreement between two parties -leaser and borrower . The one who gives vehicle for rent is leaser and the one who takes vehicle for using and pays rent is borrower.

1.2 Why Vehicle Leasing?

Vehicle Leasing is basically owning the vehicle without actually owning the vehicle. Vehicle leasing provides you to use different vehicles , as riding different vehicles is trend nowadays. Also Vehicle Leasing brings the sense of self independence. Majority of the Indians know how to ride a vehicle. Rather than spending hefty amounts of fare for taxi and auto-rickshaw ,it is better to lease and drive it yourself. It is actually a much more independent option as it provides you an option to drive whenever and wherever. It saves a lot of time as you don't need to wait for cabs.

1.3 How Vehicle Leasing Model Works?

If you want vehicle just simply search the available options nearby your surrounding and lease one. Let us suppose if you have 2 vehicles and in your daily use you just use one vehicle. Now you can simply lease your secondary vehicle. This way you can simply generate an income from your secondary vehicle. Now let us suppose if you lease a vehicle for your everyday use , you need not wait for cabs or buses and it is much more cheaper than that. It is a win - win situation for both the parties- lenders and borrowers. Lenders get an income and Borrowers get vehicles at a much cheaper price. The Borrower and Lender fix the deal through “Drive Ventures.” Both the parties undergo an agreement by the firm and can lease if they agree to it.

1.3.1 Who are the people involved ?

There are numerous people involved in the vehicle leasing process. They are :

- 1) Lenders
- 2) Recievers
- 3) Engineers
- 4) Drivers
- 5) Customer Sales Team
- 6) Finance Team
- 6) Mechanic

1.3.2 Employment Opportunities

Drive venture provides employment opportunities to large number of people. If you do not know how to drive and still want to lease a car , you can lease a car and hire a driver. In case your vehicle breaks down you can search for mechanic on the website and call to repair your vehicle. There is a Customer Sales Team which has been

established for customer help and services. The Finance Team handles finance related issues.

The whole Drive Venture has been built by Software Engineers Team . They constantly keep on upgrading the site to handle the traffic on it.

1.4 Options of Vehicles for Leasing on Drive Venture:

There are various options available for vehicle leasing. They are:

- 1) Car
- 2) Bike
- 3) Scooter
- 4) E - Vehicles

1.5 Features of Drive Venture:

There are numerous features on Drive Venture , they are:

➤ Pooling :

You can choose to pool vehicle with fellow passengers. In this way it helps to improve social interactions and communication skills. It also saves environment as pooling reduces pollution and also the fuel consumption and cost is very low.

➤ Cost Efficient:

Cost of fare of Taxi is increasing day by day. There is no slightest of doubt that Car leasing can be much more cost efficient than that.

➤ **Eco-Friendly:**

There has been option on the website for choosing Electric Vehicles or E-Vehicles. Also due to pooling it reduces the emission of carbon in the atmosphere. In this way it helps to save the environment.

➤ **Interactive UI :**

Drive Venture is very user friendly website and has a very interactive UI. It is built in such a way that it is very simple to use.

➤ **Quick Refunds :**

In case the deal locked gets cancelled due to any circumstance then one can apply for the refund on the site. The refund request will be processed within 48 working hours with a minimal platform fee.

Figure 1

CHAPTER : 2 AEIOU FRAMEWORK

The AEIOU Framework describes different steps that we came across during the planning of project. This framework consists of different concepts and thoughts that were put forward while discussing the idea of the project. AEIOU stands for :

A-Activities

E-Environment

I-Interactions

O-Object

U-Understanding

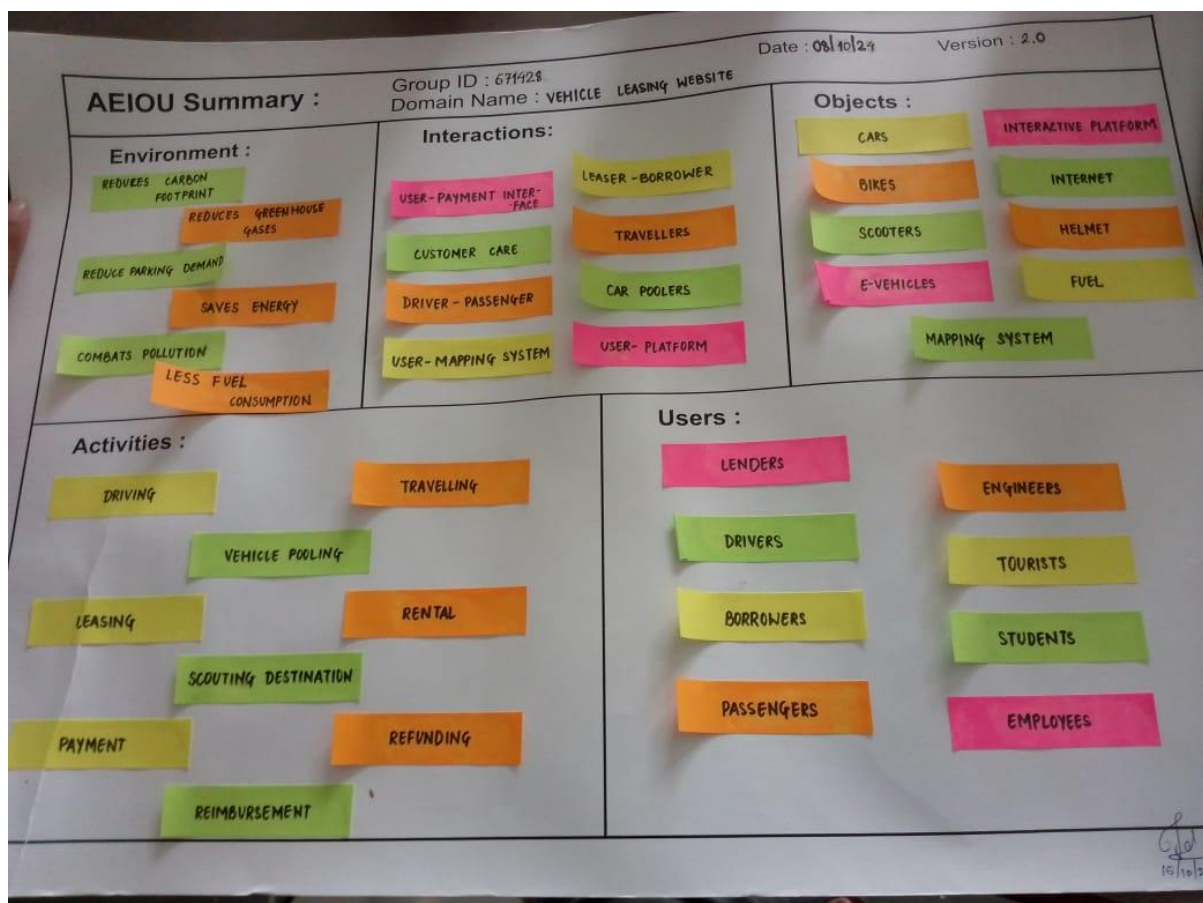

Figure 2

2.1ACTIVITY -

Activities are the actions which are involved during the process of leasing of a vehicle. In this sheet the activities are mentioned which are involved before and during the leasing on the website “Drive Venture”
The various activities are:

- Driving
- Travelling
- Vehicle Pooling
- Leasing
- Scouting Destination
- Payment
- Re-imbusement
- Refunding

2.2 ENVIRONMENT -

In this section , how “Drive Venture” helps to save environment is being discussed. It includes aspects like :

- Reducing Carbon Footprint
- Reducing Greenhouses
- Decreasing Parking Demands
- Saves Energy
- Combats Pollution
- Less Fuel Consumption

2.3 INTERACTION –

There are a number of interactions that happen during the leasing of a vehicle. This interactions can be of two types – 1) Human to Human Interaction (Leaser – Borrower) 2) Human to System (User- Website).
The interactions involved in vehicle leasing process are :

- User- Payment Interface
- Leaser- Borrower
- Customer Care
- Travelers
- Driver- Passenger
- Car Poolers
- User - Mapping System
- User – Platform

2.4 OBJECTS-

Objects are the various equipments that are being used during the entire process of Vehicle Leasing. Drive Venture includes following items as its object during the whole process :

- Cars
- Bikes
- Scooters
- E-Vehicles
- Interactive Platform
- Internet
- Fuel
- Mapping System

2.5 USERS-

Users are the people who are going to use this website for their convenience. There are basically two types of users : Technical User and General User. Technical User are the software engineers, developers ,test engineers whom use it for technical purpose like testing, updating, maintaining traffic ,etc. General users are the user who use it for their own purpose or which the website has been built.

The users of Drive Venture are listed below :

- Lenders
- Engineers
- Borrowers
- Drivers
- Passengers
- Tourists
- Students
- Employee

CHAPTER : 3 EMPATHY CANVAS

This canvas is based on understanding problem in broader sign along with applying technical knowledge. In this canvas the various activities , stakeholders , users and story boarding involved during leasing of a vehicle has been discussed. All these aspects have been discussed below :

3.1 User :

For product of any domain or business or any domain, we need to find out who are the potential customers or potential users . All the users of Vehicle Leasing website were put forward. They all are listed below :

- 1) Lender -The person who provides vehicle for rent.
- 2) Passenger - The person who travels in a vehicle.
- 3) Borrower - The person who leases vehicle.
- 4) Driver - The person who drives vehicle.

3.2 Stakeholders :

Individuals who are actively involved in the project or organization, whose contributions vividly affect the outcome of the project are called stakeholders. Here in Drive venture , the various stakeholders are as follows :

- 1) Engineers
- 2) Lenders
- 3) Borrowers
- 4) Internet Provider

3.3 Activities :

Activities are the actions which are involved during the process of leasing of a vehicle. In this sheet the activities are mentioned which are involved before and during the leasing on the website “Drive Venture”
The various activities are:

- Driving
- Travelling
- Renting
- Pooling
- Leasing
- Scouting Destination
- Payment
- Re-imbursement
- Refunding

3.4 Story Boarding :

➤ **HAPPY :**

Manish was returning from his road trip, when he came across a boy who was very hungry. He himself had faced challenges due to hunger on his trip. So he decided he'll buy some food to the boy. When he did that a joy reflected on boy's face. After that he left that place and went home. Now he was constantly wondering that just like that child there may be lakhs of people who are facing starvation.

➤ **HAPPY :**

Then he decided to discuss this issue with his friends and together they came up with a solution of opening a small NGO. Through the means of small NGO they collect leftover food from marriages, parties, functions and social gatherings. They would make food packets and distribute it to the needy people.

➤ **SAD :**

Manish was left flabbergasted when he realised that the majority of time the food was stale and not edible. This had led to various health issues like food poisoning, fever, dysentery, etc. He thought that through the medium of this NGO, they could beat the problem of starvation and make the world a better place to live.

➤ **SAD :**

Amidst all this things, Manish and his friends decided that they'll make fresh food packets with their own money and distribute it. However due to financial challenges, this idea was facing a lot of issues to successfully execute. Eventually, they had to scrap this program.

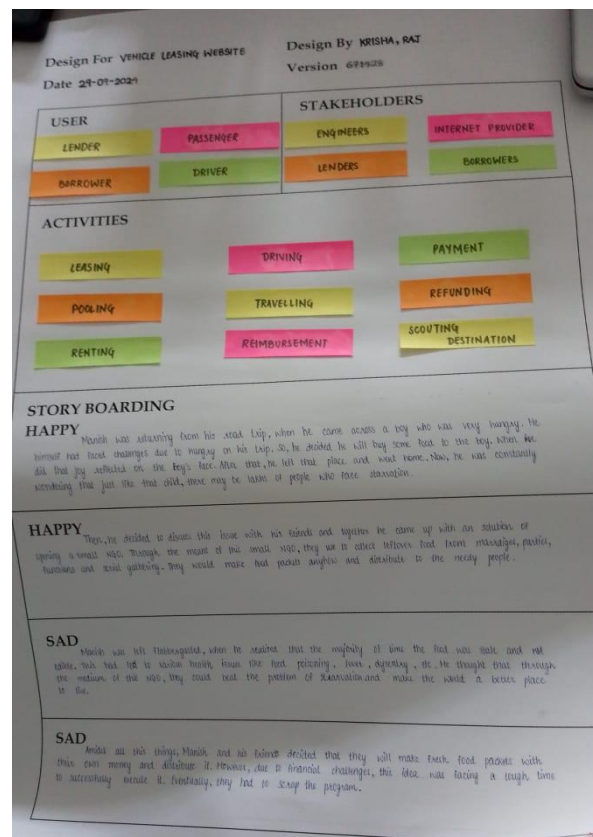

Figure 3

CHAPTER : 4 IDEATION CANVAS

The next step after knowing the potential users and activities is the discussion of how several activities need to be performed. In this section, the logical and technical knowledge of computer fundamentals can be applied not only in order to make the process of building website durably but also make it simpler to use for all the people. The website should be able to handle the traffic of the users.

The task was to make the Ideation Canvas in which there should be discussion about who are the various people, alongside the activities that needs to be performed by them. There should be mention about the situation in which one needs to use it. Also list out the tools or equipments or objects used.

4.1 People :

The people involved in the activity of vehicle leasing website of Drive Venture are:

- Lenders
- Borrowers
- Drivers
- Employees
- Passengers
- Engineers
- Mechanics

4.2 Activities:

The various process involved in Vehicle Leasing process performed by people involved in it are called activities. The various activities are as follows :

- Driving
- Travelling

- Renting
- Pooling
- Leasing
- Scouting Destination
- Payment
- Re-imbursement
- Refunding

4.3 Situation :

This section describes under which circumstances and conditions , the potential users perform the activities for leasing a vehicle on Drive Venture. There are numerous situations like this ; they all are listed below :

- Budget friendly travel
- Vehicle Pooling
- Remote Location
- Extra Vehicles
- Driving Without Owning
- Vacations
- Self Drive
- To earn money
- Public Transport strike

4.4 Objects :

Drive Venture has been built by various Programming Languages. It has been developed in basically 3 parts : Frontend, Backend, Database Management Servers. The programming languages , concepts and tools that have been used to built it are as follows :

- Data Structures
- Laptop
- Server
- Internet
- Interactive UI

- Java
- HTML
- CSS
- Javascript
- React JS
- Node JS
- MongoDB
- ExpressJS

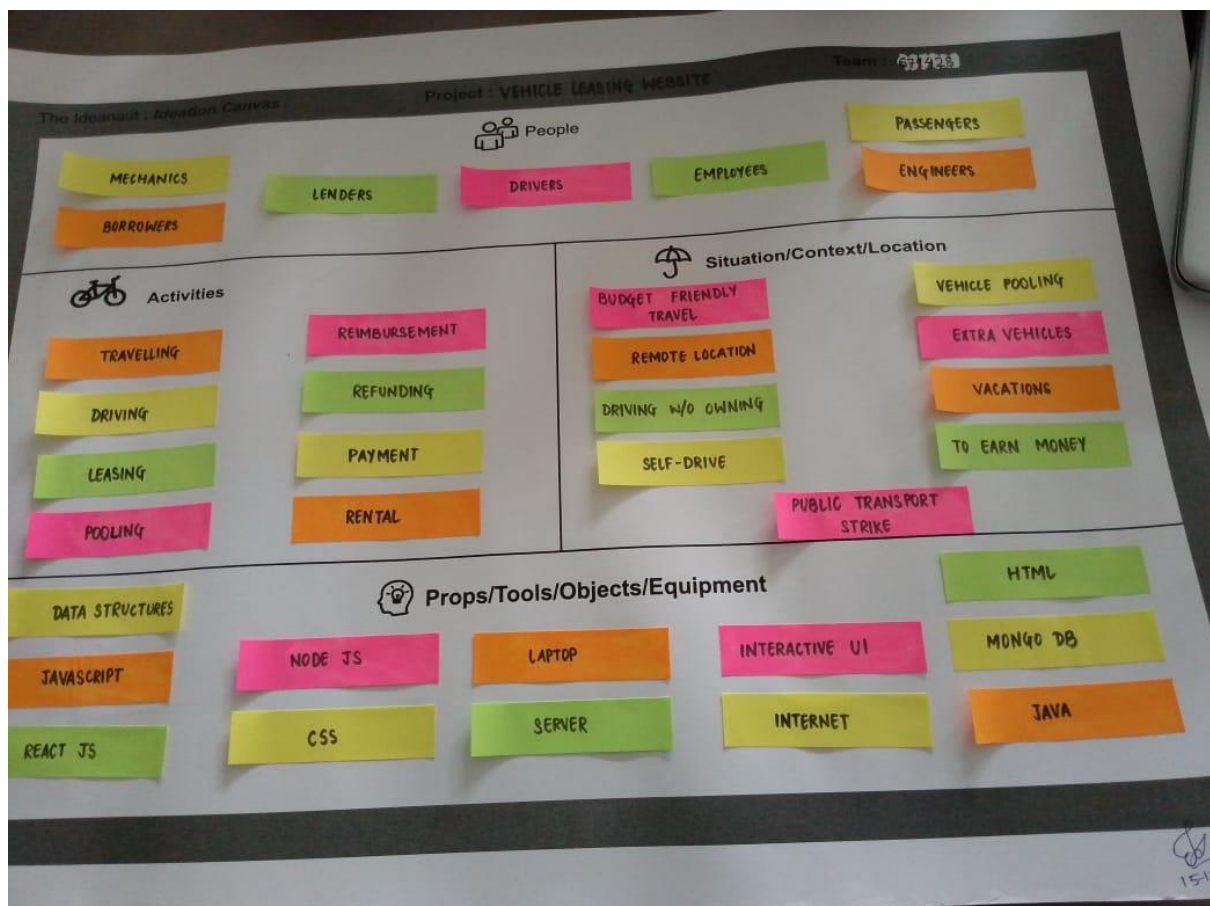

Figure 4

CHAPTER : 5 PRODUCT DEVELOPMENT CANVAS

Product development canvas can give insights about what is the product that needs to be developed , what is its purpose , who are its users , what are its features , what are the functions , what are the components?

Below is the product development canvas made for Drive Venture which is basically a Vehicle Leasing Website.

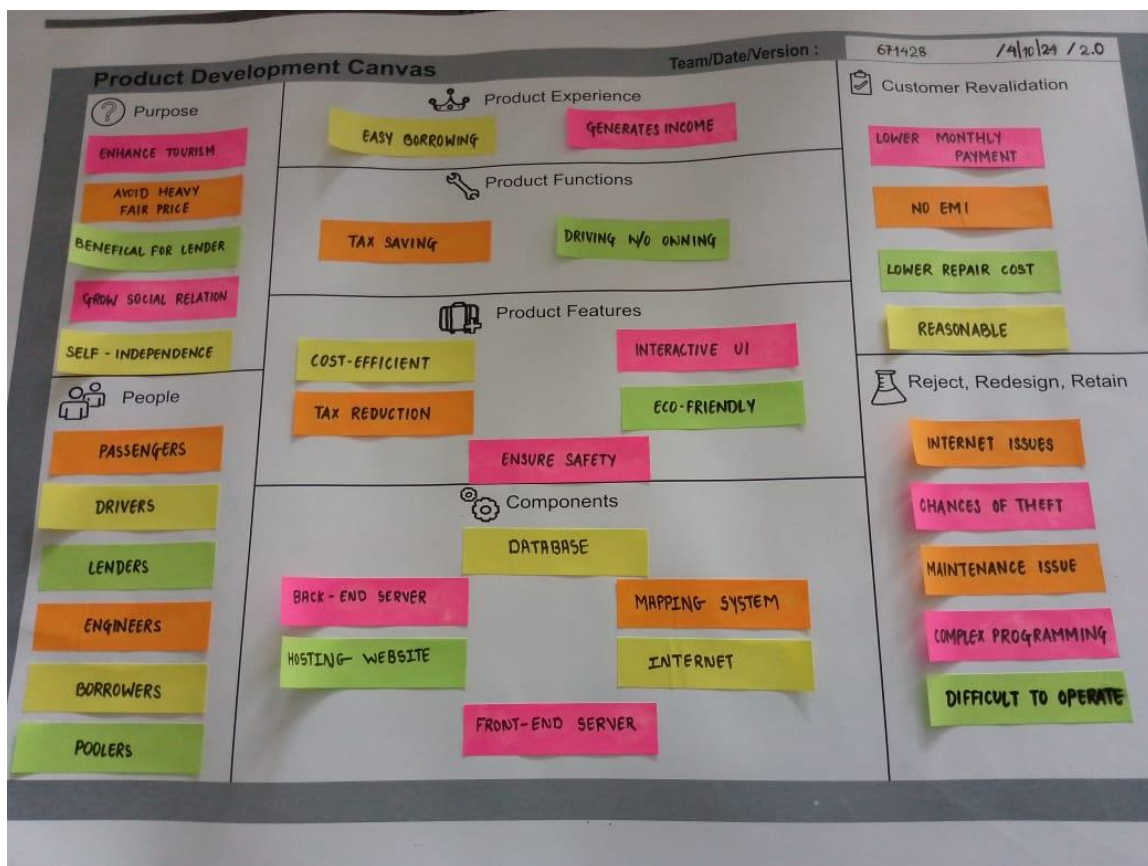

Figure 5

5.1 Purpose :

The main purpose of Drive Ventures which is a startup founded by college students of computer engineering for Vehicle Leasing has been made for various reasons. They are as listed below :

- Enhances Tourism
- To avoid heavy fair price
- Beneficial for Lender as well as Borrower
- Grows Social Relation
- Self Independence

5.2 People :

The people involved in the model of vehicle leasing website of Drive Venture are :

- Passengers
- Drivers
- Lenders
- Engineers
- Borrowers
- Poolers

5.3 Product Experience :

When users were asked for their experience of Drive Ventures , there were a numerous positive responses. The most common were :

- Easy Borrowing
- Generates Income
- Improves Communication Skills
- Reduces Carbonfootprints
- Polling Options
- Variety of Vehicles for Leasing
- Economical than Taxi

5.4 Product Functions :

There are various functions of Drive Ventures which helps an individual. However some of the basic function of this vehicle leasing website is :

- Tax Saving
- Driving Without Owning

5.5 Product Features :

Some of the amazing features of Drive Ventures has been listed below:

- Cost Efficient
- Tax Reduction
- Interactive UI
- Eco – Friendly
- Ensures Safety of Data

5.6 Components :

This Vehicle Leasing Website has been built by various Programming Languages. It has been developed in basically 3 parts : Frontend, Backend, Database Management Servers. The programming languages, and other various components that have been used to built it are as follows :

- Database
- Back-end Server
- Front-end Server
- Mapping System
- Internet
- Hosting Website

5.7 Customer Revalidation :

There are numerous benefits of this vehicle leasing system for everyone involved in its business model . However if we just look from the customer point of view , there are few points like :

- Lower Monthly Payment
- No EMI
- Lower Repair Cost
- Reasonable

5.8 Reject , Redesign , Retain :

Although there are numerous benefits of this vehicle leasing website for everyone involved in its business models , but still however there is no running away from the fact that there are faults to it as well . Some of the issues are as given below :

- Internet Issues
- Chances of Theft
- Maintenance Issues
- Complex Programming
- Difficult to Operate

CHAPTER : 6 MINDMAP

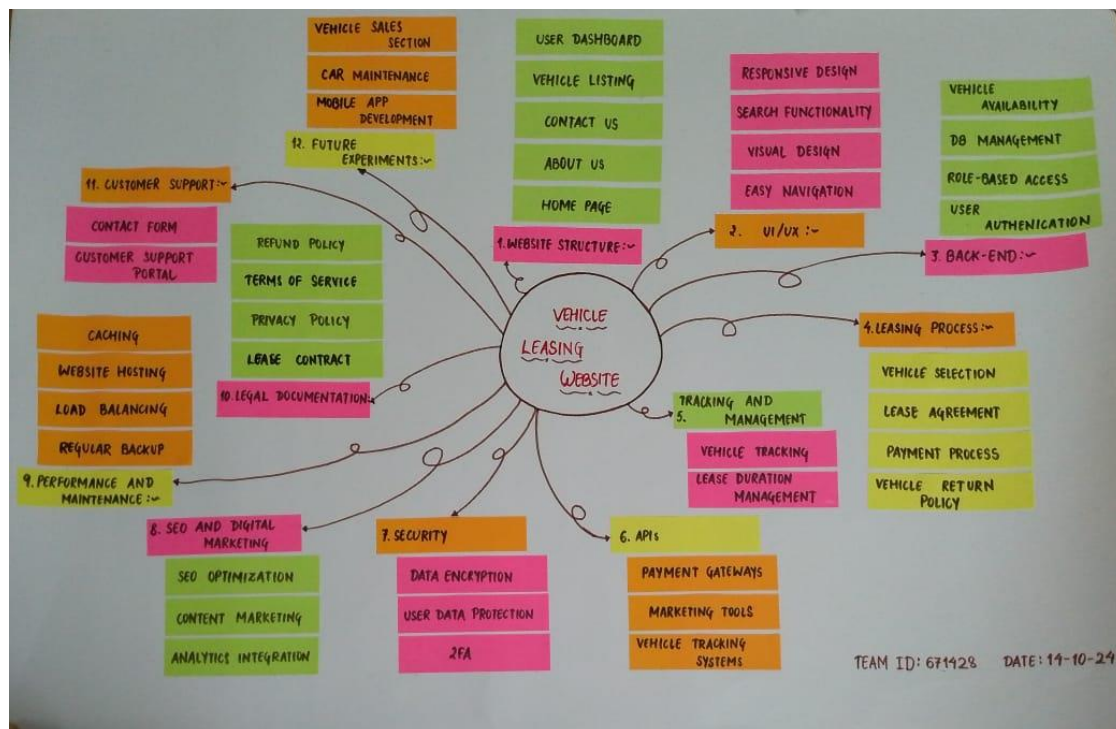

Figure 6

In this section , the mindmap of our vehicle leasing website has been discussed. Drive Ventures , the first Indian vehicle leasing website, the model of vehicle leasing website , procedure of leasing , description and features of website have been discussed in this canvas. Features like Website Structure , UI/UX, Backend , Leasing Process, Tracking and Management , API, Security , SEO and Digital Marketing , Performance and Maintenance , Legal Documentation , Customer Support , Future Experiments are listed here.

6.1 Website Structure :

There are numerous facilities provided on the website through the means of various different webpages. The basic structure of the website includes :

- User Dashboard
- Vehicle Listing
- Contact us
- About us
- Home Page

6.2 UI/UX :

The interaction of the user with the website is very crucial and should be smooth because the user should not feel any inconvenience. To provide better interaction to the user , we have included following features in the website :

- Responsive Design
- Search Functionality
- Visual Design
- Easy Navigation

6.3 Backend :

The backend of the website is very important as it stores and maintains the user information and other credentials. It is very important as it would reflect status of leasing immediately to both lender and leaser. It provides and maintains the website on role based access to the user and proceeds further on the basis of the role selected by the user. It also provides various other important data management facilities like :

- Immediate Vehicle Availability
- Database Management
- Role Based Access
- User Authentication

6.4 Leasing Process :

Under this section the leasing process of the website has been explained. The various process involved in leasing are:

- Vehicle Selection

- Lease Agreement
- Payment Process
- Vehicle Return Policy

All the process have different and interactive webpages for smooth interaction between user and website.

6.5 Tracking and Management :

This feature has been specifically established to ensure safety of the vehicle leased by the lender. The features included under this section are :

- Vehicle Tracking
- Lease Duration Management

Through this feature the leaser can view the location of their vehicle at any point of time. This reduces the chances of theft and safety of leaser's vehicle will be ensured.

6.6 APIs :

There are numerous APIs generated through unique API keys which are used in the website to integrate advanced features like :

- Payment Gateways
- Marketing Tools
- Vehicle Tracking Systems

6.7 Security :

The data is entered and stored into the database , but it important to ensure its security , and it is ensured through various means like:

- Data Encryption
- Two Fold Authentication

This methods will ensure security of the data of the user and prevent it from leaking to the outsiders or intruders.

6.8 SEO and Digital Marketing :

Our vehicle leasing website platform , we prioritize a seamless user experience while ensuring maximum visibility and engagement. We use methods like :

- Content Marketing
- SEO Optimisation
- Analytics Integration

We leverage content marketing by offering informative blogs, guides and leasing tips to educate users and establish authority in the industry. This creates a valuable resource hub, fostering trust with users and encouraging repeating engagement.

6.9 Performance and Maintenance :

To ensure smooth performance of the website we use various features like :

- Caching
- Website Hosting
- Load Balancing
- Regular Backup

We prevent the shut down of website using above techniques. This ensures that during heavy traffic on website the website does not go off and even when it does then there is no loss of data due to caching and regular backup scheduled on our system.

6.10 Legal Documentation :

There are numerous legal documentations on our website , they are:

- Refund Policy
- Terms of Service
- Privacy Policy
- Lease Contract

This documentations list the rules and regulations which are to be

followed and kept in mind while using the website , or leasing the vehicle. This documentations ensure smooth conduct of the leasing process.

6.11 Customer Support :

To help the users if there are any issues , our website would have features of :

- Contact Form
- Customer Support Portal

Through the means of Contact Us webpage , user can contact our team if they are facing any issues on the website in leasing process or any payment related issues. Users can also report bugs on the website.

6.12 Future Experiments :

This vehicle leasing website has a long way to go and various experiments can be made in the upcoming future like :

- Vehicle Sales Section
- Car Maintenance
- Mobile App Development

This vehicle leasing model has the potential to transform the transportation and tourism sector in our country, offering flexible and cost effective alternatives to vehicle ownership. With a user friendly interface and optimized content , we aim to integrate more features based on customer feedbacks and needs among the users in the market.

CHAPTER : 7 LEARNING NEED MATRIX

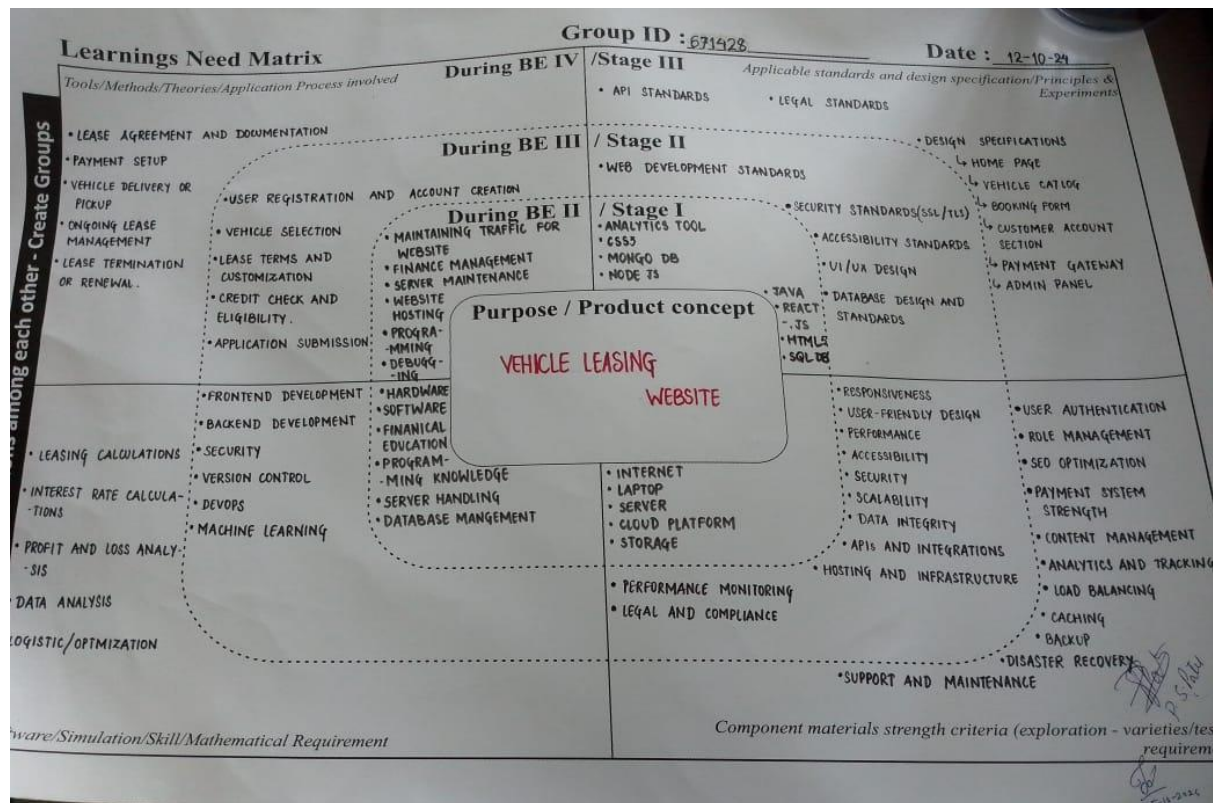

Figure 7

In this canvas what all things have been done in Stage 1, 2 and 3 , during B.E Sem III,IV and V .have been mentioned. These things have been built first and then have been upgraded on basis of valuable feedbacks provided. The various process performed are :

7.1 Theories :

➤ During Stage I

- Maintaining Traffic for website
- Finance Management
- Server Maintenance
- Website Hosting
- Programming
- Debugging

➤ ***During Stage II***

- User Registration and Account Creation
- Vehicle Selection
- Lease Terms and Customization
- Credit Check and Eligibility
- Application Submission

➤ ***During Stage III***

- Lease Agreement and Documentation
- Payment Setup
- Vehicle Delivery or Pickup
- Ongoing Lease Management
- Lease Termination or Renewal

7.2 Skills Requirement:

➤ ***During Stage I***

- Hardware
- Software
- Financial Education
- Programming Knowledge
- Server Handling
- Database Management

➤ ***During Stage II***

- Frontend Development
- Backend Development
- Security
- Version Control
- DevOps
- Machine Learning

➤ ***During Stage III***

- Leasing Calculations
- Interest Rate Calculations

- Profit and Loss Analysis
- Data Analysis
- Optimization

7.3 *Materials Exploration Varieties or Testing Requirements:*

➤ *During Stage I*

- Internet
- Laptop
- Server
- Cloud Platform
- Storage

➤ *During Stage II*

- Responsiveness
- User Friendly Design
- Performance
- Accessibility
- Security
- Scalability
- Data Integrity
- APIs and Integrations
- Hosting and Infrastructure
- Performance Monitoring
- Legal and Compliance

➤ *During Stage III*

- User Authentication
- Role Management
- SEO Optimization
- Payment System Strength
- Content Management
- Analytics and Tracking
- Load Balancing
- Caching
- Backup

7.4 Applicable Standards and Principles:

➤ During Stage I

- Analytics Tool
- CSS
- My-SQL
- NodeJS
- Java
- ReactJS
- HTML
- Express JS

➤ During Stage II

- Web Development standards
- Security standards (SSL/TLS)
- Accessibility standards
- UI/UX design
- Database design and standards

➤ During Stage III

- API standards
- Legal Standards
- Design Specifications
 - Home Page
 - Vehicle Catlog
 - Booking Form
 - Customer Account Section
 - Payment Gateway
 - Admin Panel

CHAPTER : 8 PROTOTYPE

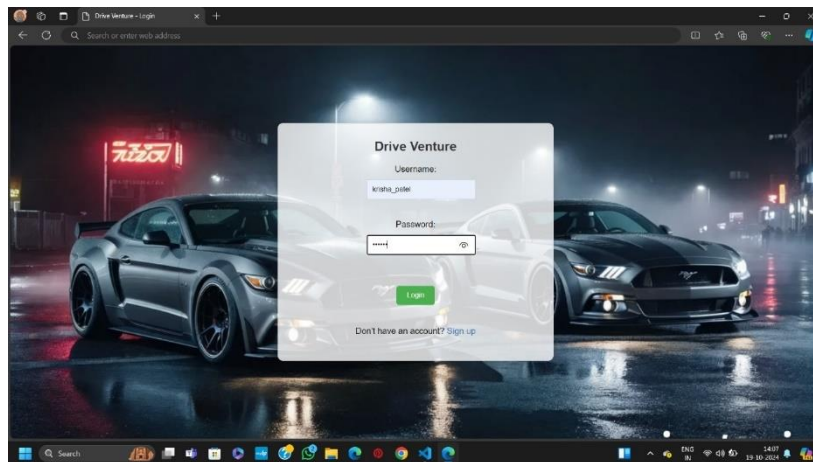

Figure 8.1

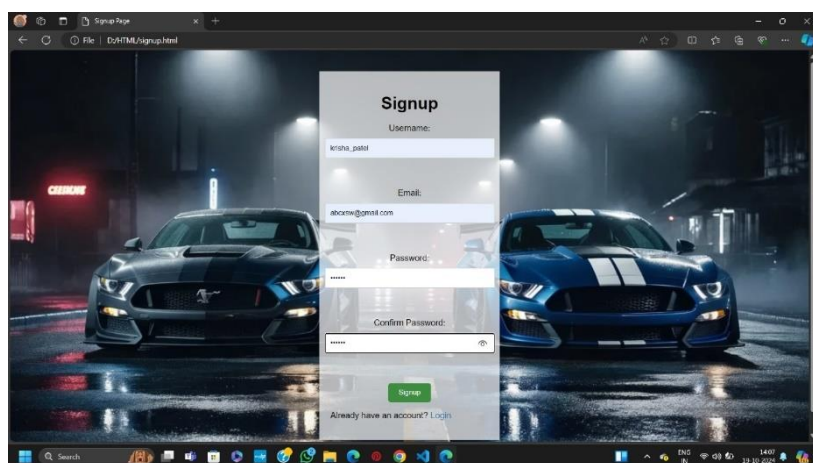

Figure 8.2

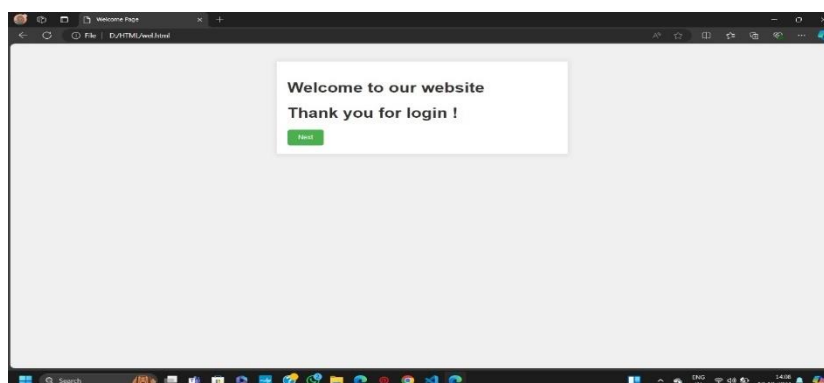

Figure 8.3

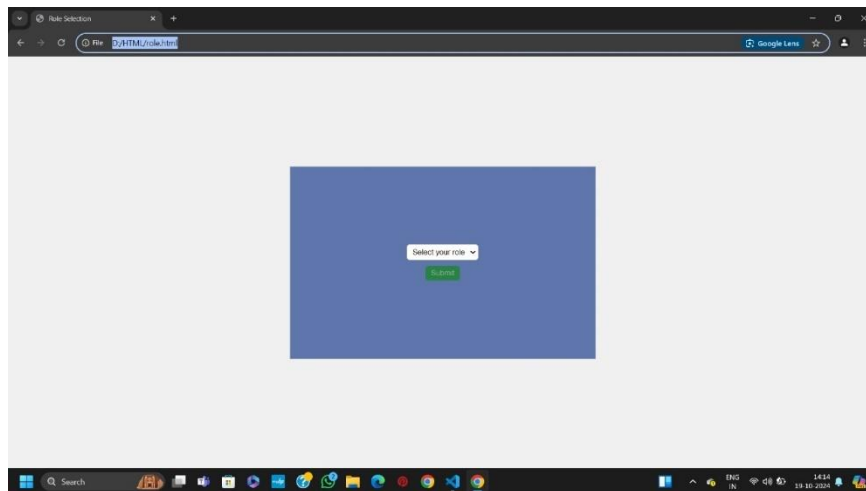

Figure 8.4

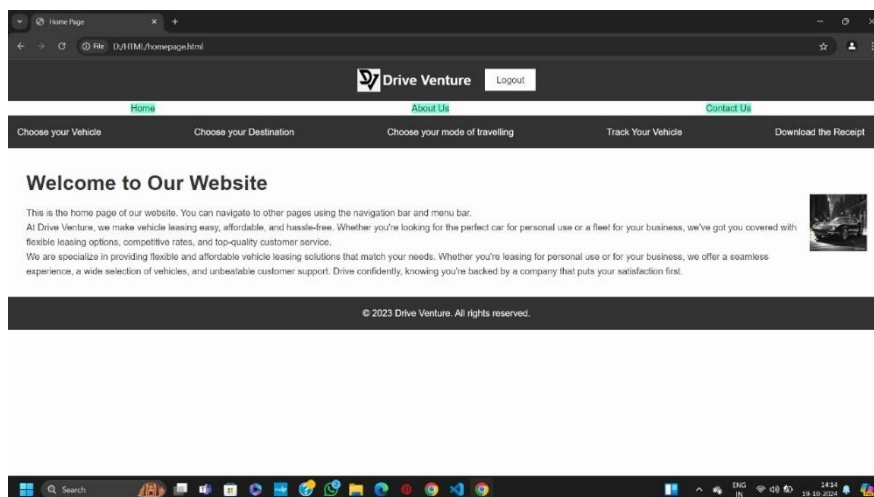

Figure 8.5

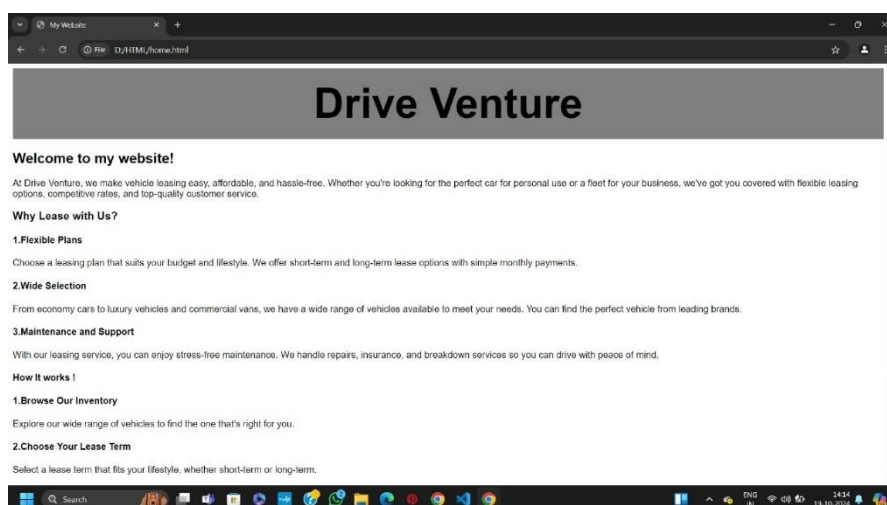

Figure 8.6

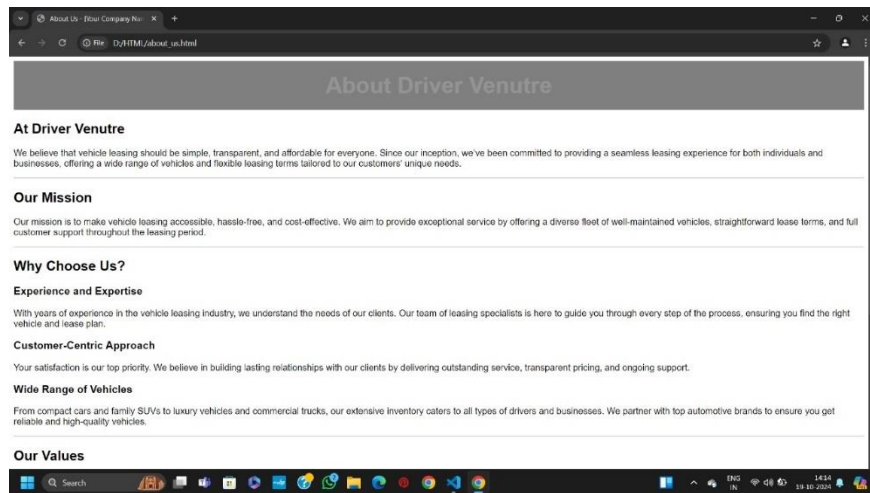

Figure 8.7

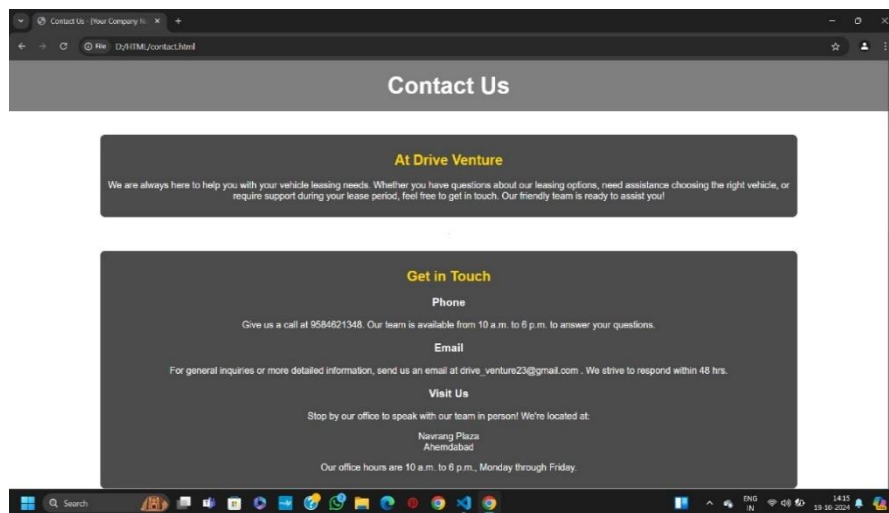

Figure 8.8

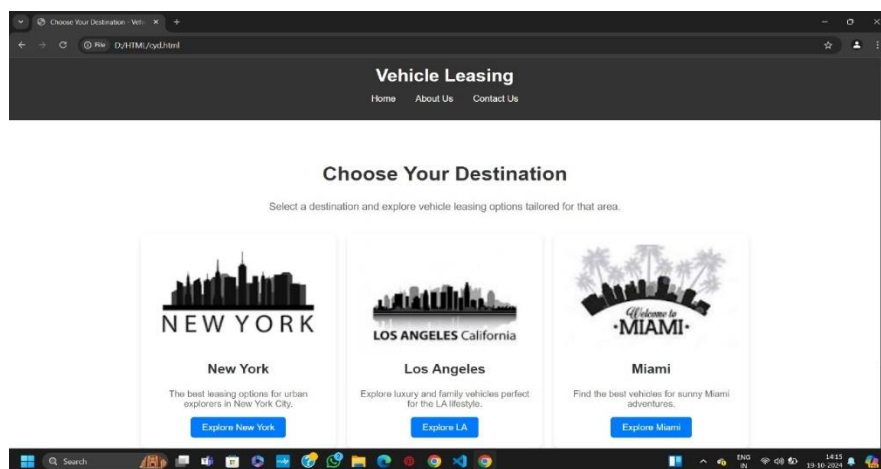

Figure 8.9

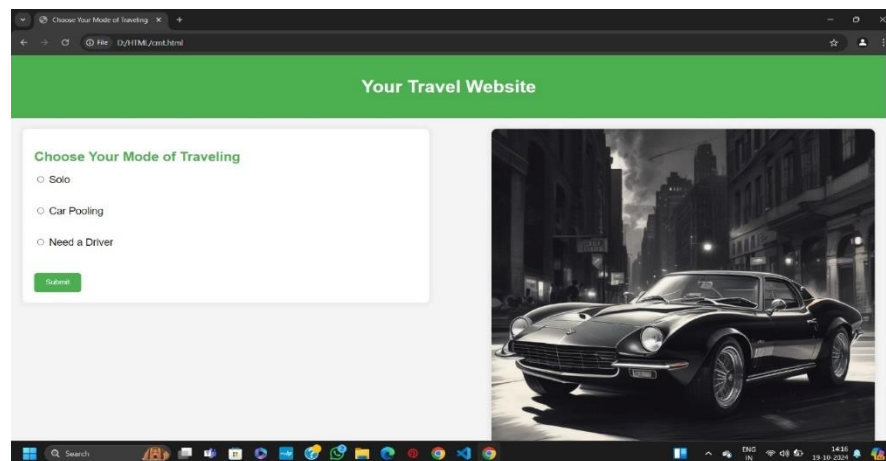

Figure 8.10

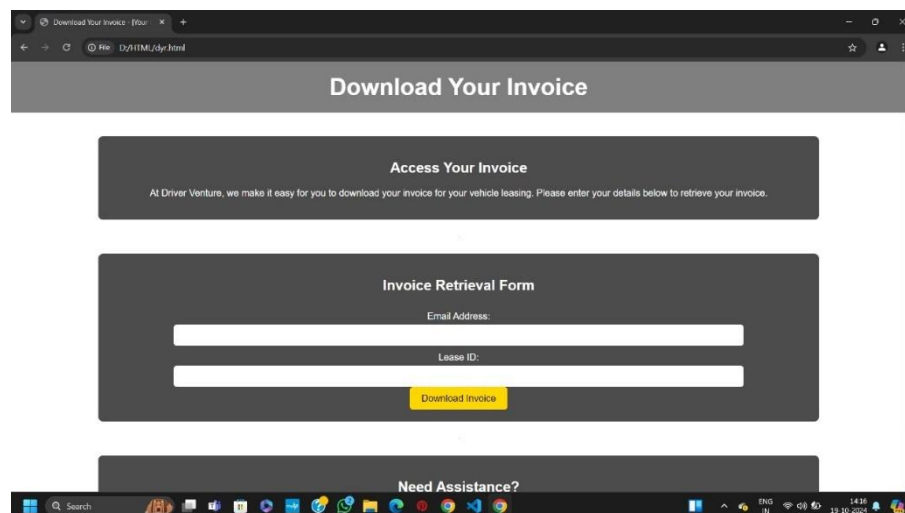

Figure 8.11

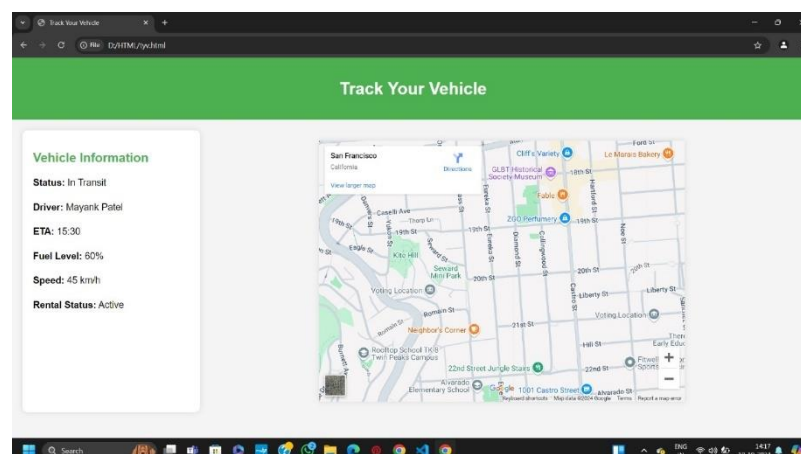

Figure 8.12

- **Figure 8.1 :**

This figure is the first page of the website. If you have used the website earlier , then you have to just login using your username and password.

- **Figure 8.2 :**

This figure is the alternative of first page, known as sign-up page. If you are using it for the first time ,you can sign up by entering the username you want , email address and password.

- **Figure 8.3 :**

This figure is the second page of the website. It displays whether you had successfully login to the website or not, if yes then it displays the thank you message.

- **Figure 8.4 :**

This figure is the third page of the website. It gives role based access to the user whether the user is a leaser or a lender , and on that basis the user can proceed further.

- **Figure 8.5 :**

This figure is the fourth page of the website. It is the first page of the website after login wherein various options are available like choose your vehicle, choose your destination , choose your mode of travelling ,track your vehicle, download the receipt. It also has options description about the website through the means of about us and also has a web page linked to contact us if in case the user wants to contact us.

- **Figure 8.6 :**

This figure is the fifth and home page of the website. It basically gives you more information of website, also it lists benefits of leasing with

our website. It then explains how leasing and other options work.

- **Figure 8.7 :**

This figure is the sixth page of website and is About Drive Venture page. It describes principles and morales at Drive Ventures. It also gives information about mission and purpose of Drive Ventures. It provides comparison of vehicle leasing website with other models and then lists benefits of choosing it over other models. It shows the values which are being set at Drive Ventures.

- **Figure 8.8 :**

This figure is of Contact Us page. If in case there are difficulties for users or there are any glitches on the website, they can contact the team through various means listed on this page.

- **Figure 8.9 :**

This figure asks us to choose our destination and on the basis of the selected destination , user can explore various leasing options. For sample in the image there are 3 destinations provided.

- **Figure 8.10:**

This figure asks user to select the mode of travelling whether it would be solo, car pooling or in case if you need a driver. This page is responsive page and proceeds further on the option selected by the user.

- **Figure 8.11:**

This figure is for downloading the invoice of user after leasing the website as a document of proof that your vehicle has been leased. This comes after the payment has been done. For downloading the invoice you need to enter your email address and lease-id. The invoice also has listed rules and regulations which the leaser needs to follow. It gives description about the duration for which the vehicle has been leased.

○ **Figure 8.12:**

This figure is of webpage used to track the vehicle. Basically this is kind of a security for the lender, as he/she can track the location of their lended vehicle. They can view the live location of their vehicle on Google Maps and this page has been developed by integrating Google Maps API key into the webpage.

CHAPTER : 9 FUTURE PROSPECTS

Figure 9

The "Vehicle Leasing Website" research report 2023 offers a comprehensive and detailed analysis of the industry segmentation. Vehicle ownership is classified into three categories of Commitment to buy, Option to buy, and Usage only. About 99% of total vehicle sales in India are bought outright, while the rest can be accounted for under leasing and subscription.

There is an expected growth of vehicle leasing in India of about 20% compound annual growth rate over the next 10 years. The vehicle leasing market in the global world is nearing \$202.5 Billion which is the peak till date. The operational leasing accounts for almost more than 60% of the total revenue.

The global demand is just going to increase in the near future and it has still not been even tried in India on such a large scale. So one can predict the growth of this website in the near future. Generally, a car's monthly lease payment is lower than the conventional vehicle finance loan. Car loan payments are generally much more expensive than lease payments. Also tourism sector in India is growing at an exponential rate and vehicle leasing will just help to promote it.

CHAPTER : 10 CONCLUSION

Drive Venture could target individuals who lack personal vehicles or rely on public transport with limited reach. The platform would offer car, scooter, or bike rentals for daily commutes, errands, or weekend getaways. Although there's still a long way to go to make this website a commercial success in India, it promises a great potential in the field of vehicle leasing. This website will be a solution to numerous problems faced by people in their day to day life in India. Drive Venture could connect car owners with renters, allowing them to earn income by leasing their underutilized vehicles. Drive Venture could provide a cost-effective alternative for those who need a car occasionally. Tourists and residents could easily access various vehicles through a user-friendly app, eliminating the hassle of dealing with traditional rental agencies. This could be particularly attractive for people with multiple cars or those who use their car infrequent. Drive Venture could charge a commission on each rental transaction, creating a sustainable revenue stream. Through the means of this website, one can achieve a sense of self-independence and also it supports the idea of "Make in India Project". Drive Venture's potential in India is vast, offering a transformative solution to transportation challenges faced by many. By targeting individuals reliant on limited public transport, Drive Venture can provide convenient access to cars, scooters, or bikes for daily commutes or weekend trips. Drive Ventures could diversify its offerings beyond traditional car leasing to include options like electric vehicles, scooters, and bikes, tapping into the growing demand for sustainable transportation solutions. By catering to a wider range of mobility needs, the platform can attract a broader customer base and stay ahead of market trends. Drive Venture could set a new trend in Indian Market, although it has a long way to go.
